

Micro Focus Software Security Center v22.1.2

Patch Release Notes

Document Release Date: July 25, 2022

Software Release Date: July 22, 2022

Products and/or Components Updated with this Patch

Fortify Software Security Center

Updates

The patch includes the following changes:

- Fixes failure to generate some reports. This was introduced by a BIRT framework upgrade.
- Fixes authentication issue when uploading jobs using `ScanCentralCtrlToken`.

This patch also includes the updates provided by the Fortify Software Security Center 22.1.1 patch:

- You can now escape HTML characters in existing bug filling templates using the following function:

```
String escapeHtmlAndXmlCharacters (String toBeEscaped)
```

Example:

```
$html.escapeHtmlAndXmlCharacters($is.get("ISSUE_DETAIL"))
```

A velocity template modification is required to create a link in the bug description for the Azure DevOps bug tracker. To create a link in the bug description for the Azure DevOps bug tracker, use the following function:

```
$html.link($is.get("ISSUE_DEEPLINK"), "Fortify Issue")
```

Although this is required only for Azure DevOps, you can also use the function with other bug tracker velocity templates.

- Library upgraded to remediate security issues
- User interface bug fixes

Documentation

- There are no documentation updates required for this patch. Use the latest versions of the documentation created for 22.1.0.

Fortify Software Security Center Installation Notes

Note: Always back up your system before installing a patch.

To install this patch:

1. Unzip the `Fortify_22.1.2_Server.zip` file. You will find the following zip file:

`Fortify_22.1.2_Server_WAR_Tomcat.zip`

2. Unzip the `Fortify_22.1.2_Server_WAR_Tomcat.zip` file. It includes a patched version of the `ssc.war` file.
3. Stop the Tomcat server.
4. Navigate to the `/webapps` directory.
5. Remove the 22.1.x version of the `ssc.war` file and replace it with the new `ssc.war` file.
6. Start the Tomcat server. Fortify Software Security Center will start up in maintenance mode.

For information about maintenance mode, see the *Fortify Software Security Center User Guide*.

7. Restart the Tomcat Server.
