Documentation updates

The title page of this document contains the following identifying information:

- Software Version number, which indicates the software version.
- Document Release Date, which changes each time the document is updated.
- Software Release Date, which indicates the release date of this version of the software.

To check for updated documentation, visit <https://www.microfocus.com/support-and-services/documentation/>.

Support

Visit the [MySupport portal](#) to access contact information and details about the products, services, and support that Micro Focus offers.

This portal also provides customer self-solve capabilities. It gives you a fast and efficient way to access interactive technical support tools needed to manage your business. As a valued support customer, you can benefit by using the MySupport portal to:

- Search for knowledge documents of interest
- Access product documentation
- View software vulnerability alerts
- Enter into discussions with other software customers
- Download software patches
- Manage software licenses, downloads, and support contracts
- Submit and track service requests
- Contact customer support
- View information about all services that Support offers

Many areas of the portal require you to sign in. If you need an account, you can create one when prompted to sign in. To learn about the different access levels the portal uses, see the [Access Levels descriptions](#).

New in this Release

This section lists the enhancements to KeyView Export SDK version 12.4.0.

- KeyView format detection has been extended, with support for 60 additional file formats. By identifying a larger range of formats present in the enterprise, decisions can readily be made on how to route, filter, or alert on such documents. For the full list, refer to the *KeyView Export SDK Programming Guide*.
- You can now extract text from PowerBI files that conform to the standard used by PowerBI 1.11.
- KeyView can now extract XrML for RMS_Protected_Fmt (pFiles).
- KeyView can now extract XrML from RMS encrypted PDF files.
- XrML subfiles extracted from pFiles or PDF files are identified as XrML.
- KeyView can now retrieve XMP metadata and text from RMS_Protected_Fmt (pFiles).
- Autodetection of RMS_Protected_Fmt (pFiles) now sets the encryption and RMS encryption flags.
- Autodetection of PDF files now sets the encryption and RMS encryption flags.
- Exif 2.32 support for JPG files has been expanded.
- KeyView outputs text from tables in iWork 13 Pages files.
- Summary information for XPS files now includes custom metadata.
- KeyView binaries for 64-bit macOS are now code-signed and notarized (this is required by macOS 10.15 Catalina).
- The OpenSSL library has been updated to version 1.1.1.
- Performance has been improved when creating images from some Microsoft Visio (VSD) files.
- The Export SDK bin folder includes a pre-built version of the HTML Export tstextract program.
- Helper scripts have been added for the ExtractExport Java sample program.

Resolved Issues

The following issues were resolved in KeyView Export SDK version 12.4.0.

- Some password-protected Powerpoint 97-2003 (PPT) files were not recognized as password protected.
- KeyView could fail to extract summary metadata from some PDF files when all metadata was requested.
- KeyView PDF Export would not return the correct error when a child process timed out.
- Some bars could be missed out in 3D bar charts generated by KeyView from Microsoft Word (DOCX) files.
- A potential stability issue when processing Microsoft Visio (VSD) files was resolved.
- KeyView could not extract attachments to MSG files that had file names that consisted entirely of non-valid characters.
- KeyView could not extract embedded objects from OpenOffice Spreadsheet Template Format Files.
- KeyView could not process OpenOffice Presentation Template Format Files.
- On Windows, KeyView could fail to process Microsoft Outlook (OST) files if the temporary directory contained forward slashes.
- The `htmlini` sample program would not build with the supplied makefiles.
- Some URLs were not identified and converted to hyperlinks correctly when the HTML Export option `KVHTMLOptionsEx.bGenerateURLs` was enabled.
- KeyView could return an error (when running out-of-process) or segfault (when running in-process) when extracting some PST files.
- KeyView could return an error (when running out-of-process) or segfault (when running in-process) when processing some ODF_Text_Fmt (ODT) files.
- PST files could not be extracted using the `pstxsr` reader when using stream mode in-process.

Requirements

This section lists the supported platforms, supported compilers, and software dependencies for the KeyView Export SDK.

Supported Platforms

- CentOS 7 x86 and x64
- FreeBSD 8.1 x86
- IBM AIX L6.1 PowerPC 32-bit and 64-bit
- IBM AIX L7.1 PowerPC 32-bit and 64-bit
- Mac OS X Mountain Lion 10.8 or higher on 32- and 64-bit Apple-Intel architecture
- Microsoft Windows Server 2012 x64
- Microsoft Windows Server 2016 x64
- Microsoft Windows Server 2019 x64
- Microsoft Windows 7 x86 and x64
- Microsoft Windows 8 x86 and x64
- Microsoft Windows 10 x64
- Oracle Solaris 10 SPARC
- Oracle Solaris 10 x86 and x64
- Red Hat Enterprise Linux 6 x86 and x64
- Red Hat Enterprise Linux 7 x64
- Red Hat Enterprise Linux 8 x64
- SuSE Linux Enterprise Server 11 x86 and x64
- SuSE Linux Enterprise Server 12 x64
- SuSE Linux Enterprise Server 15 x64

Supported Compilers

Platform	Architecture	Compiler Name	Compiler Version
Microsoft Windows	x86	cl	Microsoft 32-bit C/C++ Optimizing Compiler Version 16.00.30319.01 for x86
	x64	cl	Microsoft C/C++ Optimizing Compiler Version 16.00.30319.01 for x64
Sun Solaris	x86 64-bit	Sun Studio 12	Sun C 5.9 SunOS_i386 Patch 124868-01 2007/07/12
	SPARC 64-bit	Sun Studio 11	Sun C 5.8 Patch 121015-06 2007/10/03
Linux	x86	gcc / g++	3.4.3 (Redhat 4), 4.1.0 (SuSE Linux 10)
	x64	gcc / g++	4.1.0 (Redhat 4), 4.1.0 (SuSE Linux 10)
IBM AIX	Power	xLC_r / cc_r	IBM XL C/C++ Enterprise Edition V8.0
Mac OSX	Apple-Intel 32-bit and 64-bit	LLVM	Apple LLVM 5.1 (clang-503.0.40) (based on LLVM 3.4svn)
FreeBSD	BSD x86	gcc / g++	4.2.1 [FreeBSD] 20070719

Supported Compilers for Java Components

Component	Compiler
Java components	Java 7

Software Dependencies

Some KeyView components require specific third-party software:

- Java Runtime Environment (JRE) or Java Software Developer Kit (JDK) version 7 is required for Java API and graphics conversion in Export SDK.
- Outlook 2002 or later is required to process Microsoft Outlook Personal Folders (PST) files using the MAPI-based reader (pstsr). The native PST readers (pstxsr and pstnsr) do not require Outlook.

NOTE: You must install an edition of Microsoft Outlook (32-bit or 64-bit) that matches the KeyView software. For example, if you use 32-bit KeyView, install 32-bit Outlook. If you use 64-bit KeyView, install 64-bit Outlook.

If the editions do not match, KeyView returns Error 32: KVErrror_PSTAccessFailed and an error message from Microsoft Office Outlook is displayed: Either there is a no default mail client or the current mail client cannot fulfill the messaging request. Please run Microsoft Outlook and set it as the default mail client.

- Lotus Notes or Lotus Domino is required for Lotus Notes database (NSF) file processing. The minimum requirement is 6.5.1, but version 8.5 is recommended.
- Microsoft Visual C++ 2013 and Microsoft Visual C++ 2010 Redistributables (Windows only).

Documentation

The following documentation was updated for this release:

- *KeyView Export SDK: HTML Export Java Programming Guide*
- *KeyView Export SDK: HTML Export C and COM Programming Guide*
- *KeyView Export SDK: XML Export C Programming Guide*
- *KeyView Export SDK: XML Export Java Programming Guide*
